Experience

Web developer for Tai Chi Qugong Limburg — **Sep 2026 - Present**
Health Secrets, Venlo, The Netherlands

- Collaborating with 3 other developers to create a Tai Chi practice platform with adaptive design for the elderly

Game development intern — **Feb 2026 - Jun 2026**
GAMUCATEX, Copenhagen, Denmark

- Collaborated with developers and designers to prototype gameplay mechanics in Unity.
- Developed gameplay features using C#.
- Designed wireframes and gameplay flows in Figma.
- Participated in feature testing, iteration, and Agile sprint planning.
- Used Git for version control and team collaboration.

Academic projects

Drift the Rift — **2025**
Multiplayer card game · Godot · GDScript · JavaScript
Multiplayer card game developed in a 3-person team. Contributed to gameplay systems, character design, and technical documentation.

HomeCooked — **2023- 2024**
Mobile application · Swift · TypeScript
Designed to help students organise cooking events and connect with others. Personal contribution was focused on functionality and interface design.

Songify — **2023**
Web application · HTML · CSS · PHP
Music streaming website prototype, combining frontend design with server-side functionality. Implemented server-side functionality with PHP to support the application's core features.

Fun Fact Explorer — **2026**
Web application · HTML · CSS · JavaScript
Interactive website featuring topic-based fact exploration, quizzes, and an AI chatbot. Implemented interactive frontend features using JavaScript and designed the interface using HTML and CSS.

Education

Dankook University , South Korea, Seoul — **Aug 2025 - Dec 2025**
Exchange Program – Software convergence
International exchange focusing on software development and collaboration in a multicultural environment, with additional coursework in debate and liberal arts.

Fontys University of Applied Sciences, Venlo, Netherlands — **Sep 2023 - Present**
Bacherlor of Science in Computer Science
Relevant coursework:

- Advanced Database concepts
- Frontend Development
- Mobile Development
- Applied research and data analysis
- Computer Architecture and Networks
- Introduction to Cybersecurity
- Programming concepts
