ANNA ZHAKHYAN

Software engineering student

Academic projects

Drift the Rift

Multiplayer card game · Godot · GDScript · JavaScript

Multiplayer card game developed in a 3-person team. Contributed to gameplay systems, character design, and technical documentation.

HomeCooked

Mobile application · Swift · TypeScript

Designed to help students organize cooking events and connect with others. Developed in a team with a focus on functionality and interface design.

Songify

Web application · HTML · CSS · PHP

Music streaming website prototype, combining frontend design with server-side functionality.

Fun Fact Explorer

Web application · HTML · CSS · JavaScript

Interactive website featuring topic-based fact exploration, quizzes, and an AI chatbot.

Experience

Game development intern

Feb 2026 – Jun 2026

GAMUCATEX, Copenhagen, Denmark

- Collaborated with developers and designers to prototype gameplay mechanics in Unity.
- Developed gameplay features using C#.
- Designed wireframes and gameplay flows in Figma.
- Participated in feature testing, iteration, and Agile sprint planning.
- Used Git for version control and team collaboration.

Bakery employee

Feb 2024 – May 2025

Jumbo Supermarket, Venlo, Netherlands

- Worked in a fast-paced customer-facing environment.
- Collaborated with colleagues to maintain efficient daily operations.
- Strengthened communication, teamwork, and time management skills.

Education

Bachelor of Software Engineering

Sep 2023 – Present

Fontys University of Applied Sciences, Venlo, Netherlands

Relevant coursework:

- Advanced Database concepts
- Frontend Development
- Mobile Development
- Applied research and data analysis
- Computer Architecture and Networks
- Introduction to Cybersecurity
- Programming concepts

Dankook University, South Korea, Seoul

Aug 2025 – Dec 2025

Exchange Program – Software convergence

International exchange focusing on software development and collaboration in a multicultural environment.

About Me

Software Engineering student at Fontys University of Applied Sciences with experience developing web and mobile applications and games in collaborative teams. Completed a 5-month game development internship using Unity, C#, and Figma. Particularly interested in frontend development, web technologies, and creative digital products.
