ANNA ZHAKHYAN

Software engineering student

About Me

Software engineering student at Fontys University of Applied Sciences with international study experience in South Korea. Passionate about software development, game design, and web technologies. Skilled in Java, web development, and collaborative project work. Looking for an internship to contribute to real-world projects while expanding knowledge of modern development practices.

Skills

- **Cybersecurity:** Hands-on experience with security principles and threat analysis
- **Software Development:** Experience in game development and object-oriented programming
- **Collaboration:** Worked effectively in cross-cultural, agile teams using Scrum methodology
- **Tools & Technologies:** GitHub, Visual Studio, IntelliJ, Xcode, Figma, Godot
- **Learning & Adaptability:** Fast learner

Proficiencies

- HTML (advanced)
- CSS (advanced)
- Java (intermediate)
- JavaScript (intermediate)
- Swift (beginner)
- SQL (intermediate)
- PHP (beginner)
- GDScript (advanced)
- JavaFX (beginner)
- Typescript (beginner)
- C# (intermediate)

Languages

English(C1), Bulgarian(native),
Russian(native), German(B1),
Dutch(A2), Korean(A1)

Projects

- **Mobile game - Drift the Rift** **2025**
GDScript, JavaScript
Developed card-based game inspired by a D&D campaign with a 3-member team.
Implemented gameplay functionality, character design, and documentation.
Hosted database on Raspberry Pi for scalability and easy development.
Link with short portfolio:
<https://drive.google.com/drive/folders/14QCseIvzHoCRAb6k6OaOJvIMES95WpKd?usp=sharing>
- **Mobile application - Homecooked** **2024**
Swift, TypeScript
Designed and developed app for students to organize cooking events.
Built in Xcode, focusing on event creation, connections, and user experience.
- **Music streaming website - Songify** **2024**
HTML, CSS, PHP
Created a streaming platform prototype with front-end and server-side logic.
- **Flight booking desktop application** **2023**
Java, SQL
Booking application creation, including object-oriented programming and unit testing (JUnit), using Java and SQL.

Education

- Bachelor of Software Engineering** **2023 - Present**
Fontys University of Applied Sciences, Venlo, Netherlands
My education focuses on practice-based learning and collaboration.
Expected Graduation - July 2027
- Dankook University , South Korea, Seoul** **2025**
Exchange Program - Software convergence

Experience

- GAMUCATEX, Copenhagen - Game design intern** **2024-2025**
Use of C#, Unity and Figma for prototyping and designing mechanics
- Jumbo Supermarket, Venlo - Bakery employee** **2024-2025**
Daily use of team working and customer interaction skills
